

Range Pricing for Libraries (Format I or II)

This much requested feature will give you the flexibility to set up Drop Down or Check Box library items using a range pricing table as an option to the straight per/1000 cost. To use the range table, just click on the table icon (Fig. 1) and enter your quantity ranges with corresponding per/1000 rate pricing. (Fig. 2)

When a range pricing table is in use, the word “range” will appear in the straight Cost/1000 field. The MR Cost and Minimum Cost fields can always be used to fine tune your pricing.
